Program aims

The Undergraduate Certificate of Information Technology Business Analysis is an industry-oriented qualification focussing on the effective analysis, development and management of information and communication technologies in organisations. The certificate will provide you with the opportunity to develop the basic skills required to work in business analysis. It will equip you with expertise in business process management and the skills to analyse, understand and manage data. The Information Systems sector is one of the most rapidly growing industries globally and trained professionals are in high demand by organisations of all sizes.

Program objectives

Upon successful completion, students will be able to:

- (1) apply theoretical and technical knowledge in the area of IT Business Analysis
- (2) apply problem-solving skills and use information technology for problem-solving as an individual or within a team
- (3) think critically, constructively and logically about project management principles and tools to plan project completions
- (4) communicate clearly and coherently to present relevant knowledge and ideas to a range of audiences
- (5) identify, collect, analyse and manage information for a broad range of information technology issues and challenges

- (6) demonstrate an understanding of ethical standards and socially responsible information technology practices.

Australian Qualifications Framework

The Australian Qualifications Framework (AQF) is a single national, comprehensive system of qualifications offered by higher education institutions (including universities), vocational education and training institutions and secondary schools. Each AQF qualification has a set of descriptors which define the type and complexity of knowledge, skills and application of knowledge and skills that a graduate who has been awarded that qualification has attained, and the typical volume of learning associated with that qualification type.

This program is at AQF Qualification Level 07. Graduates at this level will have broad and co.139dntkno

IT requirements

For information technology requirements please refer to the [minimum computing standards](#).

Articulation

Successful completion of this qualification will enable entry and four units of credit towards the [BITC Bachelor of Information Technology](#).
